## MASTER PH

### WHY USE THIS PRODUCT:

Reduces or increase PH optimally during growth and flower.

PH is critical to a great harvest. By measuring your pH, growers know exactly what their plants need. So if you want the best results, you need to measure the factors that directly affect your results.

- Made and developed in Amsterdam, The Netherlands
- Highly concentrated
- Minimum amount sufficient for good results
- Specially developed for use during the growth and flower phase

### INSTRUCTIONS:

- For soil add small amounts of PH until the ideal pH value of 5.8 to 6.1 is reached.
- For hydro/coco you need to stay at the lower end of that ratio, around pH 5.8, for optimal nutrient uptake.

### ATTENTION:

- Keep away from children
- Wear protective clothing
- Do not ingest
- Avoid eye and skin contact
- Causes burns
- PH Grow is a corrosive product
- Do not breathe vapor
- In case of contact with eyes or skin, rinse well with plenty of water and seek medical advice immediately
